Use of Non-GAAP Financial Measures

This press release contains "non-GAAP financial measures" under the rules of the U.S. Securities and Exchange Commission. This non-GAAP information supplements, and is not intended to represent a measure of performance in accordance with, disclosures required by generally accepted accounting principles, or GAAP. The reconciliation for net income and diluted earnings per share for the three- and six-month periods ended June 30, 2008 and 2007 are in the tables attached to this press release.

The company uses non-GAAP financial measures internally to manage its business, for example, in establishing its annual operating budget, in assessing segment operating performance and for measuring performance under employee incentive compensation plans. Non-GAAP financial measures are used by management in its operating and financial decision-making because management believes these measures reflect the company's ongoing business in a manner that allows meaningful period-to-period comparisons. Accordingly, the company believes it is useful for investors and others to review both GAAP and non-GAAP measures in order to (a) understand and evaluate the company's current operating performance and future prospects in the same manner as management does and (b) compare in a consistent manner the company's current financial results with past financial results. The primary limitations associated with the company's use of non-GAAP financial measures are that these measures may not be directly comparable to the amounts reported by other companies and they do not include all items of income and expense that affect the company's operations. The company's management compensates for these limitations by considering the company's financial results as determined in accordance with GAAP and by providing a detailed reconciliation of the non-GAAP financial measures to the most directly comparable GAAP measures in this press release.

The above release is subject to the completion and filing of our Quarterly Report on Form 10-Q. This release includes forward-looking statements, as defined by the Private Securities Litigation Reform Act of 1995, about Avid's performance. There are a number of factors that could cause actual events or results to differ materially from those indicated by such forward-looking statements, such as Avid's ability to meet customer needs, market acceptance of Avid's existing and new products, competitive factors, pricing pressures, delays in product shipments and other important events and factors disclosed previously and from time to time in Avid's filings with the U.S. Securities and Exchange Commission. In addition, the forward-looking statements contained herein represent Avid's estimate only as of today and should not be relied upon as representing the company's estimate as of any subsequent date.
