Use of Non-GAAP Financial Measures

This press release contains "non-GAAP financial measures" under the rules of the U.S. Securities and Exchange Commission. Non-GAAP financial measures are not based on a comprehensive set of accounting rules or principles. This non-GAAP information supplements, and is not intended to represent a measure of performance in accordance with, disclosures required by generally accepted accounting principles, or GAAP. Non-GAAP financial measures should be considered in addition to, not as a substitute for or superior to, financial measures determined in accordance with GAAP. The reconciliation of the GAAP to non-GAAP financial measures that we provide is in the tables attached to this press release.

We consider both GAAP and non-GAAP financial results in managing our business. Non-GAAP financial measures are used internally, for example, in establishing annual operating budgets, in assessing operating performance and for measuring performance under incentive compensation plans. Non-GAAP financial measures are also used in operating and financial decision-making because we believe these measures reflect our ongoing business and allow meaningful period-to-period comparisons. We believe it is useful for investors and others to also review both GAAP and non-GAAP measures in order to understand and evaluate our current operating performance and future prospects in the same manner as management and to compare in a consistent manner the company's current financial results with past financial performance. The primary limitations associated with our use of non-GAAP financial measures are that they may not include all items of income and expense that affect our operations and that the non-GAAP financial measures we use may not be directly comparable to those reported by other companies. For example, the terms used in this press release, non-GAAP operating profit and non-GAAP net income, do not have standardized meanings. Other companies may use the same or similarly named measures, but exclude different items, which may not provide investors with a comparable view of our performance in relation to other companies. We seek to compensate for this limitation by providing a detailed reconciliation of the non-GAAP financial measures to the most directly comparable GAAP measures in the tables attached to this press release.
